

Keyword: Major

Interviewee information:

- Name/nickname: Cesia
- School year: Senior
- Major: Poultry Science
- Hometown:
- Family's country of origin: Mexico

Transcript (copy segment transcript here):

[00:03:10] Yeah, when you move out and stuff. I bet they realized, "Wow, she's gone now, doing her own thing." Um, so what what is your major? Poultry Science. Yeah, Poultry science pre-vet.

[00:03:28] Oh, OK that sounds interesting. Do you know, like, um, do you remember why you chose that? What was like the time that you knew you wanted to do This?

[00:03:38] So originally, I wanted to do animal sciences. Um, and I've always wanted to be a veterinarian and so I was gonna go the pre-vet route. But then, like a Poultry science advisor came and spoke in one of my animal science classes at my community college. And like, she just kind of gave an insight of what the poultry department was about. And I just really liked how close knit that department was and how the advisors were and just how, like it feels more like a family than just a major that you are in. So that's why I chose poultry.
